

GeoSight AI

AI-Powered Geospatial Intelligence Platform

Transforming Data into Actionable Intelligence

Empowering Defence, Homeland Security, Law Enforcement, Intelligence Agencies, and Critical Infrastructure with AI-driven geospatial analytics and multi-source intelligence.

Observe. Connect. Analyse. Act.

The Modern Intelligence Challenge

Today's Threats Are Connected.

Intelligence Should Be Too.

- ▶ Critical intelligence is often scattered across multiple sources, making it difficult to identify patterns and respond quickly.
- ▶ Our platform unifies geospatial, surveillance, and operational data into a single intelligence ecosystem—helping agencies detect, analyse, and act with confidence.

One Platform. Complete Intelligence Lifecycle.

From Data Collection to Operational Action

The platform transforms isolated information into actionable intelligence through an integrated AI-powered workflow.

1 Collect

Gather data from multiple sources such as maps, surveillance systems, public records, sensors, enterprise systems, and open-source information.

2 Fuse

Bring together information about people, places, vehicles, assets, and events into a single connected view.

3 Analyse

Use AI to identify patterns, discover hidden connections, and highlight potential risks.

4 Visualise

Display insights through interactive maps, timelines, relationship graphs, and dashboards for easier analysis.

5 Respond

Help investigators and operational teams make faster decisions, prioritise actions, and coordinate effective responses.

Core Intelligence Capabilities

Powerful Capabilities. One Unified Platform.

Everything investigators need for modern intelligence operations in one integrated platform.

Geospatial Intelligence

-  Radius Search
-  Heatmaps
-  Route Analysis

AI Analytics

-  Pattern Detection
-  Threat Scoring
-  Behaviour Analysis

Relationship Analysis

-  Link Analysis
-  Timeline Analysis
-  Entity Resolution

Investigation Management

-  Case Workspace
-  Evidence Management
-  Report Generation

Unified Intelligence

One View. Complete Context.

Individual data points rarely tell the full story. The platform correlates information across locations, people, assets, infrastructure, and events to build a comprehensive operational picture.

Highlights

Unified map-based intelligence

Real-time situational awareness

Cross-domain data correlation

AI-powered relationship discovery

See the complete picture, not just individual events.

Operational Intelligence

Intelligence Across Every Mission

Defence & National Security

Monitor strategic locations and emerging threats.

Law Enforcement

Accelerate investigations through connected intelligence.

Border & Critical Infrastructure

Track movement, assets, and operational risks.

Emergency Response

Support rapid decision-making during critical events.

Designed for agencies where every decision depends on timely, accurate intelligence.

Intelligence Beyond Data

Every Location. Every Connection. Every Insight.

Modern security demands more than data—it demands intelligence. Our platform unifies geospatial, operational, and multi-source information into actionable insights for faster and more informed decision-making.

One Platform. Unified Intelligence. Unlimited Possibilities.
